Coffee Capsule Solutions Engineered in Switzerland

BONCAFE

www.bestSpresso.com

reddot design award
best of the best 2008

The model compact automatic includes automatic capsule ejection, programmable auto-shut-off setting for small and large cups.

Dimension [WxHxD] [mm] : 150x370x255
 Weight [kg] : 5.1
 Power supply [volt/watt] : 230V, 50Hz/1000W
 Water tank capacity [liter] : 1.1
 Pump pressure [bar] : 19
 Waste container : 11 capsules
 Color : Piano Black, Rusty Red

Ristretto ●●●●●
strong and rich

This full-bodied and intense aroma is a wonderful combination of Arabica beans from Central and South America and Eastern Africa, as well as a shot of Robusta from India.

Espresso ●●●●●
strong and full of flavor

The very best Arabica beans from Latin America and India are combined with strong Asian Robusta to make this classic Italian espresso.

Crema ●●●●
mild and balanced

Arabica beans from Central and South America, India and Indonesia. Releases a gentle aroma and a mild flavour.

Leggero ●●
gentle and rounded

A special roasting method gives this blend of pure Arabica beans from Central and South America and India a gentle yet well-rounded flavour.

Decaf ●●●●
refined and rounded

Carefully selected, these Arabica beans from Central and South America, India and Indonesia are complemented with Robusta beans from India. Gently decaffeinated but brimming with flavour.

Appealing and Delicious - Premium Swiss Quality

Aroma safe

The diminutive coffee capsule is at the heart of the cremesso system. Its unique blend of design and technology makes preparing an authentic cup of espresso a clean and simple process.

19 bar

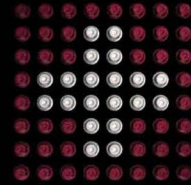

The water releases up to 1,000 different aromas as it rushes through the capsule at a pressure of 19 bar. This results in a unique flavour and a perfect espresso foam.

Energy saving design

Energy efficiency was a major factor in the machine design. The appliance automatically switches to standby mode just one minute after use, cutting consumption to less than 0.3 Watt.

50 years of experience

The company has over half a century of experience of coffee roasting. cremesso draws on its network of international experts when sourcing the beans for its speciality coffee varieties.

Coffee quality

The cremesso coffee beans come from some of the best plantations in the world. Producing regions include Central America and the terraces of Ethiopia and Asia. Each region produces beans with their own distinctive characteristics.

Technology and design

Developing the machine at the same time as the capsules enabled us to ensure that the different cremesso elements were perfectly aligned to one another. cremesso scooped a coveted international red dot design award in recognition of the machines' outstanding aesthetic properties.

Sustainability

Sustainability and careful use of resources are the mainstays of cremesso's approach to development and production. The capsules do not contain any aluminium whatsoever and can be safely discarded with other household waste.

Barista quality

At cremesso, bean roasters work hand-in-hand with Swiss engineers to ensure every single cup is a unique taste experience that meets baristas' high standards. The secret to cremesso's success is its ability to capture and refine aromas.
